

The Laughing Cow®

COLLECTION OF IMAGES FROM WIM DELVOYE

The *Wim Delyoye Images Collection* is featuring eight pictures of *Carved Tyres*, all different, since on each tyre the ornament has developed according to the existing tyre-profile; eight pictures from the series *Twisted Tyres*, wheels which, on the basis of mathematical nodal calculations, have turned into twisted elements made of black metal and chromium, thus rendering the dynamism of locomotion in a new manifestation; finally, four pictures of *Gothic Trucks* - common utility vehicles, but constructed using Gothic stylistic elements. This undermining of the serviceable design elevates it to an almost religious level, further enhanced through dynamic torsions that annul the proper function of the vehicles, endowing them with a new purpose: that of being unique, not useful. As is so often the case in art.
